Message

wahab over the last few years has been continually evolving to position itself as a leading global supply chain of various products for various energy sector in the region.

In the changing landscape, it is anticipated that customer demands will change rapidly and expectations will also increase exponentially. Our customers are faced with a multitude of challenge. **wahab** - ensure speedy project execution, delivery, cost efficiency, actively manage environmental and sustainability concerns, safety and risk management, increasing regulatory compliance needs. **wahab** is fine tuning to ensure fulfilling commitment, thereby being in a position to provide substantial reductions in project cost & time.

The foundation and the driving force of our growth are our people. From vision to excellence, it has been the contribution of individuals and the teamwork that has made this fast paced growth possible. Be it the international market or be it challenge or strategies, I am proud to say that in **wahab** every individual contributes. We have grown together over many years and the team spirit will ensure that we will continue to grow.

These are indeed exciting times for the company, given its rapid progression from providing engineering and innovative solutions and to solving complex customer challenge. Technology tools combined with core expertise poses a large window of opportunity to set in motion disruptive innovations.

Who we are

wahab an ISO certified international company specialized in providing solutions and services with special focus on oil and gas - petrochemical - power - mechanical - electrical - instrumentation - special equipments - aviation - drilling - marine - offshore - waste management system etc. Our key focus is to satisfy customers need through on time delivery of best quality products from internationally reputed manufactures at cost effective prices . Head Quartered in Kingdom of Bahrain and branch offices in Middle East, UK, USA, Canada, China, India.

wahab are better positioned in the Industry as a solution provider and also as an integrated supply chain management partner to many end users and contractors in the market we offer.

wahab and its principles are approved by major entities in the respective countries

- technical assistance - expertise
- documentation expertise
- simplified and on time delivery

Our Vision

To be internationally renowned customer focused company offering comprehensive solutions and quality products

Our Values

Customers satisfaction and loyalty
 Employee dignity
 Organisational and individual growth
 Technical excellence
 Professional ethics
 Responsibility to society

Our MISSION

Serve customers genuine and quality products
 Professional ethics
 Responsibility to society

Product Portfolio

- Oilfield Valves
- Pressure & Temperature Gauge
- Fluid End Products
- Rubber Products
- Rig Equipment & Hardware
- Mud Pumps
- Solid Control
- Blowout Preventers
- Handling Tools

FOOD WASTE MANAGEMENT

Avoiding food waste is the single greatest solution to reverse climate change !

We provide food waste management solutions for a variety commercial use. From restaurants to large - scale institutions. Utilizing microbial technology, our composting machines reduce waste volume up to 90%, decrease disposal costs and create a nutrient - rich reusable end product.

Divert waste from landfills and produce fertilizers for landscaping, gardening and farming.

24 Hour cycle to keep up with the busiest kitchens, supermarkets and food processing sites.

Wide product range to fit small businesses or large-scale operations.

BENEFITS AND CAPACITY

we have machines available to process 25 kg to 2,500 kg of food waste per day

- The volume of food waste is reduced up to 90% within a single 24-hour cycle.
- A fully automated process, with minimum noise and little or no odors.
- Our machines use a vfd (variable frequency drive), reducing energy consumption by 15%.
- State-of-the art, proven safety features.
- The output is nutrient rich soil enhancer that is environmentally safe.
- Waste food does not go to landfill where it creates methane and other greenhouse gases.
